**Lily Organics--the first & only skin care company on Earth to become U.S.D.A. certified organic grower!**

Brighton, Colorado – Lily Organics is the first and only skin care company in the world to actually go through all the rigors of becoming a U.S.D.A. certified organic grower! "This is how quality skin care is created," states, Lily Morgan the company's founder and head farm hand. "Quality is grown from the Earth in co-creation with Mother Nature," states, Lily. "Mother Nature is the best cure for Father time."

According to the British Medical Journal, Comfrey is a cell proliferant. Lily has anti-inflammatory properties; Lavender acts as an antiseptic. These are ingredients that actually heal the skin and work with your body to make you and your skin beautiful. This is not hype; these are real Earth bound constituents that make you radiant. Quality is the ingredients; nothing else will improve your skin's appearance or texture.

For Earth Day, celebrate beautiful skin with products that are truly from the Earth. Support sustainable skin care, support USDA certified organic growers. For us going green is not a trend, it is a way of life. Since 1986, before the word, "green" was ever coined; Lily was making her products without any synthetic chemicals ever!

Go to any Vitamin Cottage or Whole Foods in Colorado or New Mexico, and ask for a free sample. Earth Day is to celebrate all that is Mother Nature, and all that is agricultural. How can you get greener on Earth Day, than being a USDA certified organic grower? What else does, "green" really refer too? What do we think Earth Day is really about? Quality comes from made fresh, handcrafted, from companies with a heart and soil.

Lily Morgan is the author of *Beauty, Health, and Happiness-A way of life*. She is the founder and formulator of Lily Organics, Fresh, Chemical-free skin care line of facial care products.
