Put Your Best Face Forward Without the Price Tag...Organically!

Brighton, Colorado-October 13, 2008 Looking your best is always in style, but with the current state of the economy it is becoming more important to save every penny you can. You want to ensure that you are using the finest products available, meaning they are natural and free of cancer causing chemicals. Besides, you are exposed to enough toxic chemicals throughout the day. One way to drastically improve your skin without spending a fortune is to invest in organic skin care. Organic products work better with your skin than synthetic products and best of all can be used for multiple common beauty troubles. Lily Organics offers a simple solution. As the only Certified Organic Grower in Colorado skin care, Lily Organics contain absolutely no synthetic chemicals and are produced fresh each week in small batches to ensure purity and freshness.

"Many synthetically based products claim to make us look better, but they are not great for our health or our goal of looking great. But we don't have to sacrifice health – or the environment – to look terrific." Lily said. "To truly heal, stimulate and affect the skin in a positive way, the ingredients must be alive; they must have a life force."

Because of their natural base and use of certified organic herbs and botanicals many products can be used all over the body for varying purposes. The Organic Moisturizing Cream is great for the entire face and neck. It can also be used for the body and hands thus eliminating the need to buy several lotions to do one job. Other moisturizers also act as cuticle creams and heal cracked or dry heels. The Kukui Sensitive Facial Oil Treatment contains vitamins A, C and E and is great for the entire face, neck and body for a great vibrant glow. It also serves as massage oil, sun tan oil and even a hot oil hair treatment. Regardless, if it is day or night, summer or winter, one moisturizer, toner or cleanser can be all you need to keep your face and skin fresh and glowing. This is one of the benefits of using high quality organic products, they are versatile.

Simply put, Lily's mantra is, "The quality of a skin care product is completely determined by its ingredients." She strives to deliver this through her products ranging in price from \$15.00-\$30.00.

If the above reasons are not enough, just know you are helping save the environment as well. Lily Organics produces the smallest carbon foot print of any skin care product available, making great skin that much more satisfying.

Lily Morgan is the author of Beauty, Health and Happiness – A Way of Life. She is the founder and formulator of Lily Organics, an organic, fresh and chemical free skin care line of facial care products.
